

Declaration of compliance

Products: CPP Cast Bags and roll material with and without outside print, with and without perforation
Raw materials: PP-cast from our raw material art no: 40 115, 40 118, 40 119 and 40 120. With flexo printing ink.

We confirm that the PP-types used for the above mentioned products fulfill the requirements on materials and articles used for food contact as described in the European Regulation (EU) no. 10/2011 as amended up to and including (EU) no. 2020/1245.

Monomers and additives used for the manufacturing of these products are all listed in Annex I of Regulation (EU) no. 10/2011 as amended up to and including (EU) no. 2020/1245.

The PP-types contain substances restricted by specific migration limits. These limits, as well as the limit values for certain metals given in Regulation (EU) no. 10/2011 up to and including (EU) no. 2020/1245 annex II, are complied with when the products are used as specified below.

The inks used on the outside of the products are formulated and manufactured in accordance with the "EuPIA Guideline on Printing Inks applied to the non-food contact surface of food packaging materials and articles". The inks are formulated in a way that minimizes potential migration. Furthermore Stenqvist conducts a tape test to ensure that the ink is fully cured before the materials are stacked or rolled to avoid any set off.

The products may contain the following dual use additives:

E171, Titanium dioxide
E330, Citric acid
E470a, Sodium, potassium and calcium salts of fatty acids
E470b, Magnesium salts of fatty acids
E471, Mono- and diglycerides of fatty acids
E475, Polyglycerols esters of fatty acids
E551, Silicon dioxide
E572, Calcium stearate

The PP-types contain the following substances restricted by specific migration limits.

Substance Ref No	SML (T) (mg/Kg)
39815	0.05
83595	18
68320	6
39120	1,2
21130	6
38820	0.6
39090	1,2
95360	5
39815	0,05
Aluminium (Al)	1

The products do not contain a functional barrier as defined in Regulation (EU) no. 10/2011.

Overall and specific migration tests have been conducted according to the specifications set out in Regulation (EU) no. 10/2011 as amended up to and including (EU) no. 2020/1245.

The products can be used for long term contact with all types of food at refrigerated and frozen conditions, for contact at up to 40°C for up to 30 days, for up to 70°C for up to 2 hours and for up to 100°C for up to 15 minutes.

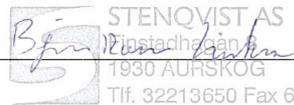

The products do not apply any danger to health or environment according to Framework Regulation (EC) No. 1935/2004, article 3. The products comply with the requirements on labelling and traceability given in article 15 and 17 in Regulation (EC) 1935/2004. The products are manufactured according to Regulation (EC) no. 2023/2006 on Good Manufacturing Practice. The products comply with current EU-legislation on plastic materials and articles intended for food contact as described in Regulation (EU) No 10/2011 as amended up to and including (EU) no. 2020/1245 and the Norwegian "Forskrift om materialer og gjenstander i kontakt med næringsmidler".
